Guidelines for All Business Sectors

Signage

- Post signage - no one with a fever, symptoms, or known exposure in the prior 14 days, is permitted
- Post signage regarding
 - physical distancing,
 - gatherings,
 - options for high risk individuals, and
 - staying home if sick

Guidelines for All Business Sectors

Physical Distancing Best Practices

- Establish physical distancing policies/practices
- Clear communication/signage
- Limit occupancy
- Limit in-person work-related gatherings
- Encourage telework or move/stagger workstations
- Utilize face coverings where possible

- Establish policies and practices for physical distancing between co-workers and between members of the public. (See sector-specific guidelines below for more detailed information on public engagement.)
- Provide clear communication and signage for physical distancing in areas where individuals may congregate, especially at entrances, in seating areas, and in check-out lines.
- Limit the occupancy of physical spaces to ensure that adequate physical distancing may be maintained. (See sector-specific guidelines for more detailed information.)
- Encourage telework whenever possible.
- For those businesses where telework is not feasible, temporarily move or stagger workstations to ensure six feet of separation between co-workers and between members of the public.
- Where possible, employees and customers should utilize face coverings. ([See CDC Use of Cloth Face Coverings guidance](#) for more detailed information). Where six feet of physical distance is not possible in a given business setting, employers should provide face covering to employees, such as utilizing the [CDC Use of Cloth Face Coverings guidance](#).
- Limit in-person work-related gatherings, including conferences, trade shows, and trainings.
- When in-person meetings need to occur, keep meetings as short as possible, limit the number of employees in attendance, and use physical distancing practices.

Guidelines for All Business Sectors

Enhanced Cleaning and Disinfection Best Practices

- Clean/disinfect high contact areas and hard surfaces
- Provide access to and instruct workers to disinfectant shared tools/equipment
- Provide hands washing station or hand sanitizer
- Implement short breaks to increase hand washing or provide sanitizer
- Provide best hygiene practices on a regular basis

- Practice routine cleaning and disinfection of high contact areas and hard surfaces, including check out stations and payment pads, store entrance push/pull pads, door knobs/handles, dining tables/chairs, light switches, handrails, restrooms, floors, and equipment. Follow CDC Reopening Guidance for Cleaning and Disinfection and use an EPA-approved disinfectant to clean. For high contact areas, routinely disinfect surfaces at least every 2 hours. Certain surfaces and objects in public spaces, such as shopping carts and point of sale keypads, should be cleaned and disinfected before each use.
- To the extent tools or equipment must be shared, provide access to and instruct workers to use an [EPA-approved disinfectant](#) to clean items before and after use.
- Provide a place for employees and customers to wash hands with soap and water, or provide alcohol-based hand sanitizers containing at least 60% alcohol. (See sector-specific guidelines for more detailed information.)
- When developing staff schedules, implement additional short breaks to increase the frequency with which staff can wash hands with soap and water. Alternatively, consider providing alcohol-based hand sanitizers with at least 60% alcohol so that workers can frequently sanitize their hands.
- Provide best hygiene practices to employees on a regular basis, including washing hands often with soap and water for at least 20 seconds and practicing respiratory etiquette protocols. A CDC training video is available here: <https://www.cdc.gov/handwashing/videos.html>

Guidelines for All Business Sectors

Enhanced Workplace Safety Best Practices

- Screen employees prior to starting work
- Display signage instructing employees not to work when sick
- Flexible sick leave policies
- Reduce exposure of high risk employees
- Designate staff responsible for COVID-19 concern responses
- Implement staggered shifts
- Limit number of employees in break rooms
- Find alternatives pre-shift meeting information
- Public health considerations for unoccupied buildings

- Establish a relationship with your local health department and know who to contact for questions.
- Prior to a shift and on days employees are scheduled to work, employers should screen employees prior to starting work. Employees should also self-monitor their symptoms by self-taking of temperature to check for fever and utilizing the questions provided in the VDH Interim Guidance for COVID -19 Daily Screening of Employees before reporting to work. For employers with established occupational health programs, employers can consider measuring temperature and assessing symptoms of employees prior to starting work/before each shift. CDC considers a person to have a fever when he or she has a measured temperature of 100.4° F (38° C) or greater, feels warm to the touch, or gives a history of feeling feverish. Implement practices such as those described in VDH Interim Guidance for COVID -19 Daily Screening of Employees for examples of a screening questionnaire. A sample symptom monitoring log is available in this Interim Guidance.
- Instruct employees who are sick to stay at home and not report to work. If an employee becomes ill or presents signs of illness, follow CDC What to Do if You Are Sick guidance. Employers should post signage in the common languages of the employees telling employees not to come to work when sick.
- Develop or adopt flexible sick leave policies to ensure that sick employees do not report to work. Policies should allow employees to stay home if they are sick with COVID-19, if they need to self-quarantine due to exposure, and if they need to care for a sick family member. Employers should recommend that employees follow CDC guidance on If You Are Sick or Caring For Someone.
- Some employees are at higher risk for severe illness from COVID-19. These vulnerable employees include individuals over age 65 and those with underlying medical conditions. Vulnerable employees should be encouraged to self-identify and employers should take particular care to reduce their risk of exposure, while making sure to be compliant with relevant Americans with Disabilities Act (ADA) and Age Discrimination in Employment Act (ADEA) regulations.
 - Consider offering vulnerable employees duties that minimize their contact with customers and other employees (e.g., restocking shelves rather than working as a cashier), if agreed to by the employee.
 - Protect employees at higher risk for severe illness by supporting and encouraging options to telework.
 - If implementing health checks, conduct them safely and respectfully, and in accordance with any applicable privacy laws and regulations. Confidentiality should be respected.
 - Other information on civil rights protections for workers related to COVID-19 is available here.
- Designate a staff person to be responsible for responding to COVID-19 concerns. Employees should know who this person is and how to contact them.

- Implement staggered shifts for both work periods and break periods. Consider cohort scheduling where groups of employees only work with employees in their group.
- Limit the number of employees in break rooms and stagger breaks to discourage gatherings.
- Use messaging boards or digital messaging for pre-shift meeting information.
- If the building has not been occupied for the last 7 days, there are additional public health considerations that should be considered, such as taking measures to ensure the safety of your building water system. However, it is not necessary to clean ventilation systems other than routine maintenance as part of reducing the risk of coronavirus transmission.

CONSIDERATIONS FOR GOVERNMENT AND BUSINESS

1. Response efforts to the COVID-19 pandemic are **locally executed, state managed, and federally supported**.
2. **Critical infrastructure workers and employers** should follow guidance from the Centers for Disease Control Prevention (CDC), as well as state and local government officials, regarding strategies to limit disease spread.
3. **Employers must comply with applicable Occupational Safety and Health Administration (OSHA) requirements for protecting critical infrastructure workers** who remain on or return to the job during the COVID-19 pandemics guidance and enforcement information for workplaces at www.osha.gov/coronavirus.
4. Businesses and government agencies may continue to implement **organization-specific measures**, which protect the workforce while meeting mission needs.

5. Workers should be encouraged to **work remotely when possible** and focus on core business activities.
6. When continuous remote work is not possible, businesses should **enlist strategies to reduce the likelihood of spreading the disease.**
7. Consider the **impact of workplace sick leave policies** that may contribute to an employee decision to delay reporting medical symptoms. **Sick employees should not return to the workplace** until they meet the criteria to stop home isolation.
8. Critical infrastructure employers have an obligation to **limit to the extent possible the reintegration of in person workers who have experienced an exposure to COVID-19** but remain asymptomatic in ways that best protect the health of the worker, their co-workers, and the general public.
9. All organizations should **implement their business continuity and pandemic plans or put plans in place** if they do not exist.

5. Workers should be encouraged to work remotely when possible and focus on core business activities. In person, non-mandatory activities should be delayed until the resumption of normal operations. 5. Workers should be encouraged to work remotely when possible and focus on core business activities. In person, non-mandatory activities should be delayed until the resumption of normal operations.

6. When continuous remote work is not possible, businesses should enlist strategies to reduce the likelihood of spreading the disease. This includes, but is not limited to, physically separating staff, staggering work shift hours or days, and other social distancing measures. While the CDC recommends that everyone wear a cloth face cover to contain respiratory droplets when around others, critical infrastructure employers must consider how best to implement this public health recommendation for source control in the workplace. For example, employers may provide disposable facemasks (e.g., surgical masks) instead of cloth face coverings when workers would need to wear masks for extended periods of time (e.g., the duration of a work shift) or while performing tasks in which the face covering could become contaminated.

7. Consider the impact of workplace sick leave policies that may contribute to an employee decision to delay reporting medical symptoms. Sick employees should not return to the workplace until they meet the criteria to stop home isolation.

8. Critical infrastructure employers have an obligation to limit to the extent possible the reintegration of in person workers who have experienced an exposure to COVID-19 but remain asymptomatic in ways that best protect the health of the worker, their co-workers, and the general public. An analysis of core job tasks and workforce availability at worksites can allow the employer to match core activities to other equally skilled and available in-person workers who have not experienced an exposure. CDC guidance on safety practices for critical infrastructure workers is maintained at <https://www.cdc.gov/coronavirus/2019-ncov/community/critical-workers/implementing-safety-practices.html>

9. All organizations should implement their business continuity and pandemic plans or put plans in place if they do not exist. Delaying implementation is not advised and puts at risk the viability of the business and the health and safety of the workers.

U.S. Department of Homeland Security May 19, 2020

10. **Reliance on technology and just-in-time supply chains means that certain workers must be able to access certain sites, facilities, and assets to ensure continuity of functions.**
11. Government workers, such as emergency managers, and the business community need to **establish and maintain lines of communication.**
12. **Essential critical infrastructure workers need continued and unimpeded access** to sites, facilities, and equipment within quarantine zones, containment areas, areas under curfew restrictions, or other areas where access or movement is limited to perform functions for community relief and stability; for public safety, security and health; for maintaining essential supply chains and preserving local, regional, and national economic well-being.
13. Whenever possible, **local governments should consider adopting specific state guidance on essential workers to reduce potential complications of workers crossing jurisdictional boundaries.** When this is not possible, local jurisdictions should consider aligning access and movement control policies with neighboring jurisdictions to reduce the burden of cross-jurisdictional movement of essential critical infrastructure workers.

10. Reliance on technology and just-in-time supply chains means that certain workers must be able to access certain sites, facilities, and assets to ensure continuity of functions. The vast majority of our economy relies on technology and therefore information technology (IT) and operational technology (OT) workers for critical infrastructure operations are essential. This includes workers in many roles, including workers focusing on management systems, control systems, and Supervisory Control and Data Acquisition (SCADA) systems, and data centers; cybersecurity engineering; and cybersecurity risk management.

11. Government workers, such as emergency managers, and the business community need to establish and maintain lines of communication.

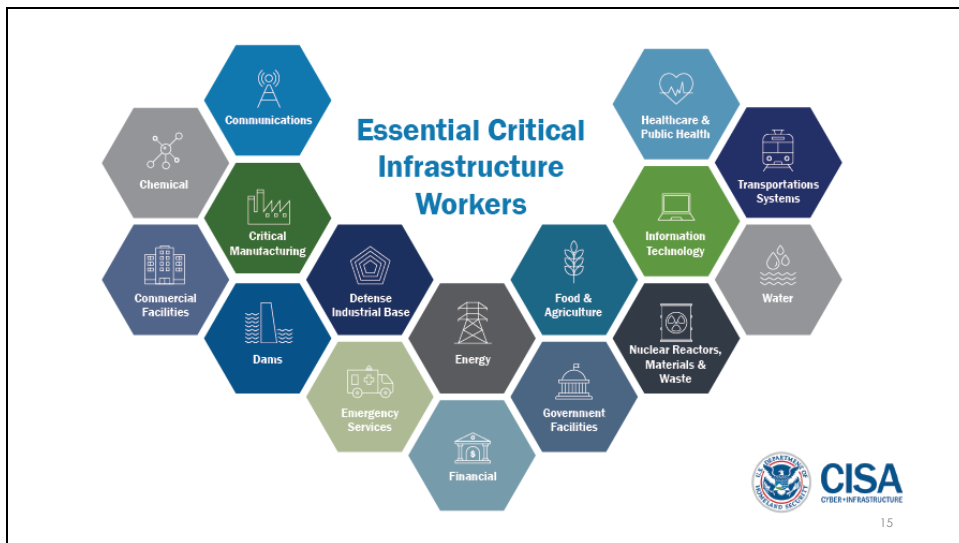

12. Essential critical infrastructure workers need continued and unimpeded access to sites, facilities, and equipment within quarantine zones, containment areas, areas under curfew restrictions, or other areas where access or movement is limited to perform functions for community relief and stability; for public safety, security and health; for maintaining essential supply chains and preserving local, regional, and national economic well-being.

Ex Order 62

JURISDICTIONS TEMPORARILY DELAYED FROM ENTERING PHASE ONE IN EXECUTIVE ORDER 61 AND PERMITTED TO REMAIN

The Northern Virginia Region's entrance into Phase One will be delayed and the restrictions above shall remain in place until 11:59 p.m., May 28, 2020.

On May 9, 2020, local officials from the Counties of Arlington, Fairfax, Loudoun, and Prince William, and the Cities of Alexandria, Fairfax, Falls Church, Manassas, Manassas Park, as well as the Towns of Dumfries, Herndon, Leesburg, and Vienna (Northern Virginia Region) requested to remain in Phase Zero.

AMENDED NUMBER SIXTY-TWO (2020) AND AMENDED ORDER OF PUBLIC HEALTH EMERGENCY FOUR

JURISDICTIONS TEMPORARILY DELAYED FROM ENTERING PHASE ONE IN EXECUTIVE ORDER 61 AND PERMITTED TO REMAIN IN PHASE ZERO

PHASE ZERO JURISDICTION

Effective Date of this Executive Order This Order shall be effective 12:00 a.m., Friday, May 15, 2020 and further amends Executive Order 55. Unless otherwise expressly provided herein, this Order shall remain in full force and effect until 11:59 p.m., Thursday, May 28, 2020, unless amended or rescinded by further executive order.

On May 14, 2020, the City of Richmond and the County of Accomack requested to delay implementation of Phase One. After considering the City of Richmond's and the County of Accomack's requests and the relevant data, I find the requests to delay entering Phase One and to remain in Phase Zero appropriate.

On May 14, 2020, the City of Richmond and the County of Accomack requested to delay implementation of Phase One. Unlike many jurisdictions in the Commonwealth, the City of Richmond's percent positivity of COVID-19 cases has failed to decrease over the past two weeks. Further, its total case count grew. Although Accomack's population is .39% of the Commonwealth, its positive cases represent 2.14% of the statewide totals. Similarly, the number of COVID-19 cases in the County of Accomack continues to increase. Local health officials opine that the County of Accomack's total positive cases could increase by over fifty percent in a matter of days. After considering the City of Richmond's and the County of Accomack's requests and the relevant data, I find the requests to delay entering Phase One and to remain in Phase Zero appropriate.

THE SAFE SIX: WORKPLACE READINESS ESSENTIALS

The migration from furloughed and Work From Home (WFH) workforce back to places of business will look different for every organization. How can real estate owners most effectively prepare their assets for the return of building occupants? And how can employers make sure they are prepared to receive their workforce—and make sure their employees are prepared? Faced with many of the same challenges, owners and occupiers have a unique opportunity to come together, following a handful of operational guiding principles to help navigate the return to the workplace.

PREPARE THE BUILDING
Cleaning plans, pre-return inspections, HVAC & mechanicals checks

- ❑ Ensure safety of all workers
- ❑ Ready Mechanical, HVAC, Fire/Life Safety systems
- ❑ Clean with products from approved lists from governing authorities.
- ❑ Ensure compliance with owner/ Landlord requirements policies
- ❑ Engage vendors in back-for work plan
- ❑ Review and prepare plans regarding changes to cleaning scope or any additional services
- ❑ Ensure all inspections, remediations, repairs and communications are complete before re-opening

PREPARE THE WORKFORCE
Policies for deciding who returns and when, employee communications

- ❑ Mitigate anxiety of returning to the workplace through change management planning and communications
- ❑ Consider why people can benefit from returning to work
 - Productivity from proximity to colleagues, socialization, amenities, and work tools & resources
 - Health and family priorities, reduced commute time, technology enables WFH without loss of productivity
- ❑ Develop and execute detailed plan on how to return to work
- ❑ Advise on alternate means of safe commuting
- ❑ Prepare and post reminders of social distancing and cleaning protocols

CONTROL ACCESS
Protocols for safety and health checks, building reception, shipping/receiving, elevators, visitor policies

- ❑ Control the entry points including deliveries
- ❑ Reconfigure gathering and lobby areas for social distancing
- ❑ Install plexiglass shields as appropriate
- ❑ Clearly communicate building protocols through signage and floor markings
- ❑ Consider temperature screening
- ❑ Provide sanitizer, wipes, PPE as appropriate
- ❑ Disable touchscreens

CREATE A SOCIAL DISTANCING PLAN
Decreasing density, schedule management, office traffic patterns

- ❑ Consider phasing based on roles and priorities, including temp workers if needed
 - Alternating work weeks in the office and WFH
 - Staggered arrival/departure times
 - Enable teams to negotiate their own "in-office" schedules
- ❑ Introduce planning to support social distancing/ 6 Feet Office Protocols
- ❑ Monitor space usage
- ❑ Specify seating assignments for employees to ensure staff adheres to minimum work distances
- ❑ Redesign spaces, alternate desk/chair use, etc. for social distancing
- ❑ Add panels between desks including height adjustable panels for sit/stand desks
- ❑ Enforce stringent cleaning protocols for shared spaces
- ❑ Reduce capacity of spaces—e.g., remove tables/chairs from lounge

REDUCE TOUCH POINTS & INCREASE CLEANING
Touchless ingress/egress, clean desk policy, hand plan, cleaning session areas

- ❑ Maintain enhanced cleaning and disinfecting practices
- ❑ Supply disinfectants near or on each desk or work area, particularly those that are shared
- ❑ Remove food/beverages - consider restricting with single-serving items
- ❑ Enable DIY cleaning through hand sanitizer, disinfectant wipes, and other such products
- ❑ Sanitize all workspace areas, including office, conference rooms, breakroom, cafeteria, restrooms, and other areas prior to opening. Ensure appliances/ equipment are in working order
- ❑ Limit in person meetings
- ❑ Consider low-touch or no-touch switches, doors, drawers and other fittings
- ❑ Remove high-touch shared tools such as whiteboard markers, pens

COMMUNICATE FOR CONFIDENCE
Recognize the fear in returning, communicate transparently, listen/ survey regularly

- ❑ Ensure leadership alignment on re-entry
- ❑ Establish two-way communication
- ❑ Ensure a trusting and transparent culture
- ❑ Clearly set employee expectations, with an emphasis on making them feel secure
 - Return to work/WFH policies and incentives
 - Guest and visitor policies
 - Employee travel policies
 - HR policies regarding illness, support for caregivers, etc.
